**Alfa Romeo 33 1.8, Modified race car**

The Alfa Romeo 33 is the ultimate 80's Alfa, the few that have survived the onset of rust are fast becoming classics. This particular car is a race modified version of the road car with a 1.7 engine bored out to 1.8 to maximise performance. The car is very well known in the Alfa Racing Championship over the last ten years or so and is the precursor to the other 33 we have for sale. The panels on this car are mainly composite making it very light. The brakes are inboard as with the road car.

**Not road legal**

Circa 200 BHP  
Full racing gearbox  
Spare set of wheels  
Set of body moulds included

Great entry level car into club racing, very fast and great value for money.
